Dear colleagues and participants!

Allow us to express our sincere gratitude for your participation in the preparation and holding of the conference. In these difficult times for Ukraine, the support and contribution of each of you to the development of education and science is extremely important, and the integration of the One Health principles is more relevant than ever.

The Russian occupiers are constantly attacking the critical infrastructure of Ukraine, which leads to blackouts of electricity and the Internet, directly affecting the event. We ask you to be patient and understand possible technical issues. A recording will be made during the conference, which will be available for viewing on the project website.

Sincerely,
Organizing Committee
